Exterior Door Systems
For over 40 years we’ve been building better doors. Doors that offer unbeatable quality, convenience and design. Doors built in America, by people passionate about everything that opens and closes. Wood, fiberglass, steel. We work with them all. Fashioning doors engineered to perform- day after day, after day. So, whether you’re after one, or many, be confident. Because with MASTERCRAFT®, you will always get a great door, inside and out.

**Quality**
Doors are opened, closed, slammed, kicked and knocked on every day. No matter the material, ours are built to last.

**Customization**
Doors allow you to express your creativity and personalize your home; this is why we offer the opportunity to design a door that is right for your home.

**Convenience**
We make buying a door easy, fast, and reliable. Yes, customized doors that are built and shipped in 7 days.

Choosing Your Door Material

Whether you prefer the strength and security of steel or the durability of fiberglass, every MASTERCRAFT® Exterior Door is energy efficient and is built to last a lifetime.

MASTERCRAFT® prefinished woodgrain steel feature a 7 mil thick vinyl, creating a corrosion, chemical, scratch and fade resistant surface that is 5 times thicker than paint! You get the look of wood without the maintenance and all the same great benefits of our steel door.

MASTERCRAFT® prefinished solid color steel provide the same great benefits of all steel doors and go through a 7-step finishing process to provide a lifetime of vibrant fade resistant color. Spend more time enjoying the view and let us do the finishing for you.

FOLLOW THE KEY

Look for these icons throughout the brochure to know what material each door is available in

- **PS**: Prefinished Steel
- **S**: Steel
- **PF**: Prefinished Woodgrain Fiberglass
- **SF**: Smooth Fiberglass
### EXTERIOR DOOR OVERVIEW

#### Steel

**Primed Steel**

Featuring 24 gauge galvanized steel, a polyurethane foam core, and a rigid durable construction. MASTERCRAFT® steel doors are built to provide security and energy efficiency while offering the largest selection of styles.

#### Fiberglass

**Prefinished Woodgrain Fiberglass**

MASTERCRAFT® prefinished woodgrain fiberglass doors feature a woodgrain texture and the same great benefits as our smooth fiberglass doors. Spend more time enjoying the view and let us do the finishing for you.

**Smooth Fiberglass**

MASTERCRAFT® smooth fiberglass doors are constructed with a smooth, durable surface and made of composite material, providing the perfect surface for a clean, painted finish.

STEEL DOOR ADVANTAGE

What you can expect from your MASTERCRAFT® Steel Door.

A Complete Frame System
Choose from multiple frame options featuring high performance compression weatherstripping.

B Energy Efficient Insulated Glass
Safety tempered insulated glass.

C Reinforced Lock-Block
Added to provide strength and security.

D Rigid Steel Construction
Durable 24 gauge galvanized steel surfaces resist rust, peeling and warping. MASTERCRAFT® Steel Doors are built with a wood stile and composite rail, providing maximum protection against temperature fluctuation.

E Polyurethane Foam Core
An environmentally friendly Polyurethane foam is sprayed in, allowing it to fill every inch of the door. This helps make MASTERCRAFT® Steel Doors one of the most energy efficient doors on the market.

F High Definition Door Panels
Deep embossing creates a sharp and detailed look, adding to the curb appeal of each door.

G Tight Sealing Sweep
The flexible bottom sweep creates a tight seal to prevent water or air infiltration.

H Superior Sill Construction
Our sill is designed to prevent energy loss and build-up of condensation and adjusts to create a tight seal. Each sill features a composite bottom that will not rot.

FIBERGLASS DOOR ADVANTAGE

What you can expect from your MASTERCRAFT® Fiberglass Door.

A Complete Frame System
Choose from multiple frame options featuring high performance compression weatherstripping.

B Energy Efficient Insulated Glass
Safety tempered insulated glass.

C Reinforced Lock-Block
Added to provide strength and security.

D Durable Fiberglass Construction
MASTERCRAFT® Fiberglass Doors are low maintenance, energy efficient doors. Made with HydroShield™ Technology to provide optimal protection against cold transfer and will not rust, rot, or dent.

E Polyurethane Foam Core
MASTERCRAFT® Fiberglass Doors are filled with an environmentally friendly polyurethane foam core for the highest insulating value.

F High Definition Panel Design
Deep embossing creates a sharp and detailed look, adding to the curb appeal of each unit.

G Tight Sealing Sweep
The flexible bottom sweep creates a tight seal to prevent water and air infiltration.

H Superior Sill Construction
Our sill is designed to prevent energy loss and buildup of condensation and adjusts to create a tight seal. Each sill features a composite bottom that will not rot.

No matter what color you decide to paint it, start with a MASTERCRAFT® door.
MATERCRAFT® Frames

Door Frames are available in many materials and widths to meet your needs. All come with high performance compression weatherstripping to prevent air and water infiltration.

*All frame options shown with matching Brickmould.

Painting Your Frame

We recommend lightly sanding then painting wood frames with a high quality latex paint. Once a year, verify that the paint is still in good shape, not flaking or peeling. Repaint if needed.

*Required for Primed Frame
SILLS

This high-profile outswing sill, with advanced weatherstrip, is engineered to create a tight seal and keep water and air from infiltrating your home. (double doors only)

ADA Accessible Sill

Our ½” tall ADA accessible sill meets residential and commercial building codes while maintaining the proper slope to keep air and water out.

Outswing Sill

MASTERCRAFT® adjustable sills are designed to prevent energy loss and build up of condensation while creating a tight seal, every time.

External Grille 22" x 48" 6 Lite
Shown in Primed Steel
ACCENTS, HINGES, & KICKPLATES

Glass Accents
Glass accents are the metal bands that join the glass together on select glass options. Choose hinges and a sill to match the glass accent to tie the look of the door together.

Hinges
Choose hinge colors to match your style and complete the look of your door.

**Standard Exterior Hinges**
- Removable Pin (for easy door removal)
- 3 Hinges used per door
- 4”x4” Hinge size

**Spring-Loaded Exterior Hinges**
- Allows door to close automatically, with adjustable tension, to ensure a proper closing force
- 2 Hinges used per door and 1 standard hinge
- 4”x4” Hinge Size

Kickplates
Adding a kickplate to any door provides increased durability and protection to a commonly mistreated portion of the door. The three color options available will allow you to match other accessories on your door.
3-POINT SECURITY LOCK

3-Point Security Locking System

Add a factory-installed security locking system to your exterior door and leave the worries behind you.

SECURITY - Lock engages the door frame at 3 critical points, offering maximum security for you and your family.

CONVENIENCE - 3-point lock comes factory-installed for easy installation of your door system.

Handle Sets Available for 3-Point Locking System

Rain Security Glass

Rain Security Glass 22” x 64” Shown in Prefinished Navy Blue Steel Door

Learn more on page 35.

Combine a 3-point securing locking system and Rain security Glass for optimal home protection.
Pet Accessible Doors
Complements most 32”, 34”, and 36” wide doors with a 6-panel or 6-panel with 22”x36” lite panel design.

- Paint-ready, raised mould design
- Flexible vinyl flaps
- Internal strengthening ribs
- Factory-installed for perfect fit every time
- Plastic snap-on closing panel when limited access is necessary
- Soft, dual flap for tight weather seal
- Outer-frame weather resistant design

Peep Site
Peep sites provide added function and increased privacy and come factory installed in your door.

Dentil Shelf
The Dentil shelf complements a mission style door and adds an extra level of detail to your home.
DOOR CONSTRUCTION

Interlocking Heads
Continuous heads with interlocking mull posts for exceptional strength

Installation Clip
Keeps the door square for easier installation

Weatherstrip
High performance compression weatherstripping and corner seals create a tight seal to keep the weather out.

One Piece Mull Construction
Our mull systems include inactive seats engineered for perfect sidelite panel placement.

Sill Gaskets
Provide second water barrier between the sill and the frame

Continuous Sidelite Door Systems Benefits

Engineered Sidelite Gasket Seats
Engineered for perfect panel placement and a clean finished look

Inswing Double Door System Benefits

Installation Clip
Helps keep the door square for easier installations

Pre-Installed Catch Plates
Speeds up installation

Thermally Broken Astragal
Reduces cold transfer

Weatherstrip
High performance compression weatherstripping and corner seals create a tight seal to keep the weather out.

Sill Gaskets
Provide second water barrier between the sill and the frame
Corner Seals
All of our MASTERCRAFT® doors have corner seals installed in the bottom corners of the frame on an exterior door. These seals help to prevent air leakage and water from entering the home. Make sure that the corner seals are in good condition once the door is installed. If a seal shows signs of damage, promptly replace the damaged seal with a new corner seal, which are available at your local MENARDS® store.

Caulking of door
All exterior frame styles need to be caulked in three major locations to stop the infiltration of water and air:

A Caulking around the brickmould
A bead of caulk should be applied around the outer edge of the brickmould and where the brickmould contacts the frame to prevent infiltration from between the door and the house.

B Caulking around the sides of the sill
The sill should be caulked from the front of the sill, around the weatherstrip and corner seal, to the back of the sill; anywhere the sill contacts the frame.

C Caulking under the sill
Caulk underneath the sill and along the bottom of the sill, where the sill connects to the ground.

Check these areas once a year and recaulk as needed. Keeping these areas caulked will increase the life span of your door maintaining its function and beauty for years to come.
Patio Door Systems
Swinging Patio Doors

- Doors swing into the room
- Great for rooms with extra space to allow doors to open
- Perfect for enclosed porches and sunrooms, or decks and patios with an overhang
- More diverse selection of glass designs available

- Requires minimal space to open and close
- Larger glass area, allowing for more natural light

Top-Hanging Screen
- Screen door stays attached
- No build-up of dirt and debris
*Screen door sold separately

More Viewing Area
- LVL door stiles provide more strength, allowing for thinner stiles and 10% more viewing area

Wood Preservative on Frame
- Resistant to rot, decay, and insects

Dual Point Lock System
- Provides added security and increased performance

Continuous Fiberglass Sill with Weep System
- Prevents water infiltration
- Low-profile sill design provides easier accessibility
- Excellent thermal barrier

Tandem Rollers
- Precision ball-bearing rollers
- Provides smoother door operation than standard rollers

Exterior Aluminum Frame
White

Interior Frame
Ready-to-Finish Pine

MASTERCRAFT® Sliding Patio Doors feature an aluminum clad exterior, offering protection from the elements. The wood interior is engineered to accentuate the door’s strength and improve energy performance.

All Sliding Patio Doors have a left hand option as well as a right hand option.
