1) Using a utility knife, cut along the perimeter of the glass while holding the knife at a 45 degree angle towards the edge of the door.

2) Peel the plastic from the surface of the glass. Lightly sweep, blow, or vacuum to remove as many of the “flakes” of stain as possible.

3) Spray the glass with glass cleaner.

4) Using a flat razor blade, scrape any large pieces of excess stain from the surface of the glass.

5) Next, use the Magic Eraser pad to remove any remaining adhesive or stain.

6) Finally, use a paper towel to dry the glass surface.
